Professional Summary

I am a B.Sc. CSIT candidate with a deep interest in Database Management System. Through hands-on projects and a recent IT internship, I have developed an interest in Python and SQL. I have experience in working with writing SQL queries, performing CRUD operations, and building ETL pipelines for data migration and transformation. Experience in working with Python to automate data workflows and background tasks using Celery. I am eager to apply my database skill in a professional SQL-focused role and grow as data-driven problem solver.

Technical Expertise

- **Database:** PostgreSQL, MySQL
- **SQL Skills:** DML, DDL, Joins, Functions, Indexing
- **Languages:** Python, HTML/CSS
- **Frameworks/Tools:** FastAPI, Postman, Microsoft Excel, Jira
- **Testing Skills:** Manual testing, Test cases design, SDLC understanding, Bug reporting and tracking, Test scripting with Python
- **Version Control:** Git, GitHub

Professional Experience

I. Database Management and Python Development Internship

Machhapuchchhre Bank
November, 2025 – February, 2026

- Completed a 3 months internship in database management and python development
- Worked with PostgreSQL for database management and data querying
- Implemented CRUD operations using Python and FastAPI, interfacing with PostgreSQL databases
- Built ETL pipelines and performed background processing task using Celery

Education

Bachelor in Science, Computer Science and Information Technology
2021 – 2025(Completed 8th semester)
Tribhuvan University, New Summit College, Shantinagar, Kathmandu.

Higher Secondary Education
(2019 – 2021)
Kathmandu Model College

Secondary Education (SEE)
(2019)
Adarsha Vidya Mandir H.S.S

Personal Projects

I. File Transfer Automation System (Python, Celery)

- Developed an automated file transfer solution with task scheduling using Celery.
- Integrated Redis for worker queue management and automated watchers for file monitoring.

II. ETL Pipeline Script

- Created a high performance ETL script to migrate dataset of 10,000+ records into PostgreSQL with data cleaning logic.

III. **Automated Signup Workflow (Python, Selenium)**

- Built a web automation script that completes signup flows using Selenium WebDriver.
- Implemented data input and form validation check.

IV. **IdeaFlux**

- Built a blogging system with recommendation feature as my final year project.
- Used MERN stack with MongoDB as the primary database for creating this system.

Soft Skills

Technical Communication: effectively communicate technical concepts to both technical and non-technical audiences

Time Management: demonstrate ability to prioritize tasks and meet deadlines efficiently

Logical thinking and Creativity: apply problem solving technique with practical solutions

Team Co-ordination: collaborate effectively with team members to achieve common goals and achieve smooth workflow
